

# *Maximising the efficiency of your IT infrastructure*

**premierIT**

*IT Networking & Security - for all your IT needs*

# Meeting your needs... now and in the future

However modern or well maintained,  
IT systems are unpredictable.

You could lose connectivity, your server could crash  
or your network could be attacked by a virus.

This can have huge consequences for your  
organisation if back up plans are not in place.

Purchasing new software and hardware can be  
costly if you don't have the buying power to get the  
best deal possible; we aggregate our clients'  
requirements and pass on these cost benefits.

The solution is not necessarily to employ more  
in-house staff or spend vital budget on improving  
the knowledge of the team you have, especially for  
a one off project.

Using our flexible, professional IT services will enable  
you to focus on running your organisation while we  
take care of all, or parts, of your IT infrastructure.

For many of our clients we are simply an extension  
of their organisation that adds real value.

Our IT services are delivered by experienced and  
qualified experts. Whatever the size or nature of  
your requirements, we have the skills and resources  
to help your organisation to gain the maximum  
benefit from IT.

Working with Premier IT will give you more time to  
concentrate on what you do best at the same time  
as increasing productivity, improving return on  
investment and reducing risk.

## Our approach... a partner you can rely on

We have many years experience in helping  
organisations like yours create and work towards  
achieving long term IT strategies.

Combine this with an expansive client base across a  
variety of sectors and we have probably solved your  
problem or met your objective before in a similar  
organisation.

**Microsoft**  
**GOLD CERTIFIED**  
*Partner*

Our status as a Microsoft Gold  
certified partner is only achievable  
through competency and it is our  
people that make the difference.

They are professional, flexible and highly skilled.  
Our team of technical engineers have the necessary  
expertise to help you plan, manage and enhance any  
IT project.

Your dedicated Account Manager will help us to  
build a long term relationship with your  
organisation, ensuring that we have an excellent  
understanding of your specific needs both now and  
in the future.

We support all networks, Microsoft/Open Source  
applications and services and are happy to act as an  
interface with any other IT suppliers, meaning you  
only ever have one number to call – ours.

The services we provide and the way in which we  
deliver them can only result in the following for  
your organisation:

- Improved IT system performance
- Increased business productivity
- Cost effective IT infrastructure
- Reduced risk and peace of mind

# What can we do... to meet all your IT needs

Few organisations have all the skills in-house to cope with every IT contingency.

Whether you have a requirement for an ongoing relationship with an IT partner or an immediate need for a specific project, we can help by providing a reliable one stop shop for all your IT needs.

Our most popular services include:

## IT Support

Ongoing support to ensure that your IT systems run smoothly will help the productivity of your business.

We can provide a fast response to IT problems via:

- Onsite & remote support
- Helpdesk services - telephone & email
- Interim IT staff cover
- Server & desktop support
- Business IT outsourcing

## IT Strategy

Establishing and achieving your long term IT objectives is a vital but challenging task and it makes sense to seek the advice of an expert.

We can support you strategically with:

- IT consultancy & strategic advice
- Audits & health checks
- IT upgrades
- IT relocations
- Disaster recovery

## Network Solutions

As the platform for your entire IT system, an efficient and reliable network is essential.

We can build your network from scratch or improve/extend what you already have in place.

This includes:

- Network topology installation/consultancy
- Wireless network installation
- Network monitoring
- Secure VPN solutions

## Network Security

A secure network is a critical requirement for all organisations.

We can ensure that your security is not left to chance through the following services:

- Bespoke security projects
- Network security audits
- Security monitoring - web & email
- Advanced/bespoke routers, firewalls, Intrusion Detection Systems (IDS)
- Intrusion Prevention Systems (IPS)
- Advanced web filtering
- Email spam and virus scanning

## Hardware & Software Solutions

Selecting the right hardware and software for your organisation and ensuring that your employees know how to use them is an essential part of your IT function.

We can help you with:

- Software & hardware audits
- Educational corporate software & hardware sales
- IT training – technical and applications based
- Strategic partnerships with communications companies

## Who are we...
