

### Helping your Trust to meet and exceed its infection control mandate

#### Module focus – Infection Control

Infection Control is part of an expanding portfolio of compliance e-Learning modules developed by Premier IT, to enable Trusts to meet the requirements of the Clinical Negligence Scheme for Trusts (CNST).

e-Learning is a great way of reaching those who need to be informed. In such high risk environments as hospitals, it is vital that **ALL** Trust staff are fully compliant with your Trust's Infection Control mandate. This will enable them to lead by example, and help to minimise risk of infection outbreaks and transmission of germs.

This module will take your staff through the dangers and hazards of their workplace, and the procedures in place at your Trust to control HAI (Hospital Acquired Infection). As a result of taking this module your staff will be fully briefed on:

- Mandatory procedures to prevent HAI
- Incident management – what to do in case of infection outbreak or heightened risk
- Basic technical insight into microbiology of infection e.g. MRSA

With the recent concerns over infection control in today's national media, now is the ideal time to ensure that your Trust does not fall short of fulfilling your statutory and mandatory requirements in managing the risk of HAI...

#### Why e-Learning?

e-Learning is changing the way the NHS approaches the training and development of its employees. It enables any NHS Trust to create, deploy and distribute organisational learning to staff, quickly and easily...

#### What we do...

Premier IT is a highly experienced IT and learning solutions provider to the NHS. We can design, develop and deliver a customised e-Learning solution, tailored to meet the specific needs of your Trust.

We have developed a suite of e-Learning modules specifically designed for NHS Trusts to fulfil and exceed their staff training requirements. Please see below for a list of available modules...

#### How we do it...

Each of our e-Learning modules can be implemented easily onto any existing Learning Management System (LMS) currently in use within your Trust. Alternatively we can provide you with your own fully developed and bespoke LMS, as we have done with many of our clients, including Guy's and Thomas' NHS Foundation Trust...

#### With our LMS your Trust can:

- **track, measure and report progress of employees at every stage of their development**
- **set up automated messages to be sent supporting employees throughout their learning**

#### ...and it enables your employees to:

- **access their e-Learning from anywhere, anytime... even before they begin employment**
- **be fully compliant with your Trust's statutory and mandatory policies**

#### Our modules include...

- Blood Sampling
- Blood Transfusions
- Consent
- Deaths
- Documentation
- ECG
- Equality and Diversity
- Equipment
- Fire Safety
- Hazardous Substances
- Health and Safety
- Incident Reporting
- Infection Control
- Junior Doctors Induction
- Major Incidents
- Manual Lifting and Handling
- Prescribing
- Risk Management and Assessment
- Safeguarding Children
- Safeguarding Vulnerable Adults
- Slips, Trips and Falls
