

## **CASE STUDY**

**York and Scarborough Teaching Hospitals  
embed Job Planning for AfC  
for high quality patient care**

 **Premier IT**

## Introduction

York and Scarborough Teaching Hospitals NHS Foundation Trust utilises its resources with a focus of seizing opportunities to support staff and patients more efficiently. With hundreds of AHPs being employed by the Trust, York sought an efficient, effective Agenda for Change solution. After reviewing several systems, York chose Premier IT to deliver them Job Planning for AfC.

Premier IT already supported Medical Job Planning at the Trust, so using Job Planning for AfC was a logical next step. Coupled with excellent customer service and intuitive approaches, the solution was integrated to support hundreds of AHPs employed by York quickly.

With the use of full and real-time reporting on employees, supported by Job Planning tutorials and speciality and team reporting, Job Planning for AfC has been a key supporting solution for York. With more than 570 job plans being created since its launch, the solution is now embedded as a key supporting solution for the Trust.

## Solutions

Job Planning for AfC was integrated into York as an online calendar-based system developed specifically to manage job planning activities for AHPs. Key functionality came from creating, formatting, and managing job plan timetables in a feature-rich, innovative IT solution.

- Activate e-Job Plans for all medics
- Establish bespoke sign-off levels
- Specialty/team reporting with integrated objectives
- Model hospital exports and reporting
- Direct clinical care, supporting activities and other NHS responsibilities
- Full reporting on Job Plan status with real time reporting availability
- Full management reporting available

## Business Benefits

Following the launch of Job Planning for Agenda for Change, York and Scarborough have quickly completed full job plans for multiple, diverse cohorts. These include physiotherapists, speech and language therapists, dietitians, and occupational therapists. With extensive reporting being a key feature of this solution, the status of job plans is clear and readily accessible, resulting in efficient sign off throughout the process and a clear alignment in all job plans with contracted hours for each member of staff. York and Scarborough are well on the way to achievement of Levels of Attainment, as defined by NHS E&I. They look forward to integrating the remaining cohorts in a similarly efficient and intuitive way in the coming months.

## Client Feedback

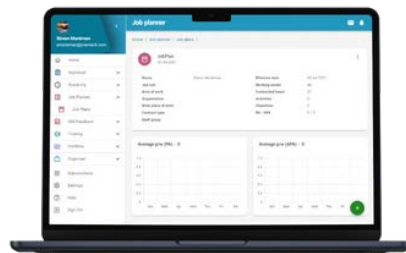

Ina James, AHP Improvements Team  
York and Scarborough Teaching Hospitals NHS Trust

*"Very easy to use system, the support we received was fantastic both from the project manager as well as the support desk, we found Premier IT to be very accessible, they always listened and were very responsive."*
