

e-Learning*

Our off-the-shelf e-Learning modules have been developed in collaboration with the healthcare sector, whilst our team of instructional designers can work with your experts to create innovative bespoke e-Learning for soft and system skills. Hosted on either your existing LMS or our own, Cortex, the content can also be seamlessly integrated into our Revalidation and Appraisal systems.

The Product

Our e-learning instructional designers and developers have years of experience working with the healthcare sector to develop bespoke e-learning content that meets the needs of their learning objectives and audience. From role-based Cerner EPR system modules to a suite of modules covering the care of patients with Sepsis, our e-Learning has been delivered to healthcare organisations, both in the UK and across the world.

In addition, our catalogue of over 130 off-the-shelf e-Learning titles are designed to help you tackle mandatory requirements for all groups of healthcare professionals from those completing the Care Certificate or Junior Doctors' Induction programmes to those who need CQC compliance training or statutory and mandatory training based on their specific role.

Modules can be customised to include organisation specific information and content is focused around best practice learning methods to ensure that users remain engaged, absorb information and are tested on their knowledge.

Content can be provided in SCORM or Tin Can/xAPI format to be hosted on your existing LMS, or Premier IT recommends our own Learning Management System, Cortex, which can be used to deliver learning, analyse outcomes and measure success. Cortex fully integrates with our PReP, HeART or Centric CPD system from which users will be able to launch content directly, update personal development plans and automatically record scores/completion.

Key Features

OVER 130 TITLES AVAILABLE

Full range of subjects available from Blood Transfusions and Infection Control to Sepsis Awareness and MSOffice.

CUSTOMISABLE FOR YOUR ORGANISATION

Information and images specific to your organisation can be combined with off-the-shelf subject matter.

SOFT SKILLS BESPOKE CONTENT

Experienced instruction designers help you to structure and develop new content that meets your learning objectives.

HEALTHCARE SYSTEMS BLENDED LEARNING

Bespoke role-based e-learning modules covering local policies to support new system rollouts and Business as Usual training. Courseware design, trainers and floorwalkers also available.

ENGAGE AND RETAIN KNOWLEDGE

Content developed to engage users in learning/increase retention with simple animations, videos, interactions, content revision and tests.

QUALITY ASSURANCE

User-friendly online review tool allows clients to review content and request changes as needed. Full internal quality assurance and testing completed.

The Benefits

SUPPORT

Key contact assigned for all queries with clear escalation routes. Telephone, email and ticketed support providing excellent customer service and support.

VALUE ADDING LMS

Easy-to-use training management system built specifically to streamline, administer and manage your organisation's training, learning and development needs.

SECURITY

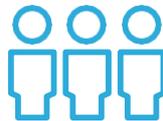

ISO27001 accredited, GDPR compliant, 100% IG Toolkit compliant, high level security with SSL data encryption, Tier 3, UK datacentres and regular penetration testing.

INTEROPERABILITY

A single platform solution. Material design framework for optimised user experience. Integration with any PReP, HeART or Centric CPD system ensures automated updates and single system user view.

PARTNERSHIP

Collaborative working with clients. Frequent user groups to gain client feedback on, and input into, product developments, feature enhancements, roadmap priorities and service optimisation.

MULTI-DEVICE LEARNING ON DEMAND

Anytime, anywhere access via all devices leading to a better user experience, engagement and completion record.

“Premier IT’s e-Learning solution has perfectly satisfied our requirement to train all clinical staff, while using far less resource than before.” Amy Gass, St George’s Healthcare NHS Trust

“The team has supported us to deliver our initial aims, but importantly, has worked in partnership with us to help shape the development of our online learning programme. At all times, the team has been quick to respond to our enquiries and support and guide us towards suitable solutions which will meet our own specific needs. The service delivered is always fast and professional.” Dr. Jane Thomson, Health Research Authority

About Premier IT

Premier IT: specialists in e-Learning, workforce planning, development and performance software for the healthcare sector.

We provide market leading solutions to over 200 clients in the healthcare sector spanning the primary, secondary and independent healthcare landscape.

Our services cater for the needs of all healthcare professionals; from consultants, doctors and GPs to nurses, midwives, and care support staff.

We help our clients ensure they have a team with the right skills, in the right place, at the right time and achieve the right outcome for both their patients and organisation.

Right skills.
Right place.
Right time.
Right outcome.
